

# seca 274 and seca 264

Two wireless stadiometers  
for use anywhere or  
permanent wall installation

**EMR-integrated**

**seca 274**

**seca 264**

- Network-capable with seca 360° wireless technology.
- For digital measuring of small children and adults.
- Frankfurt Line for precise positioning of head.
- White backlit LCD display in headpiece.
- Stable glass platform with integrated heel positioner (seca 274).
- Non-slip rubber mat with heel positioner (seca 264).

## seca 274 and seca 264:

The new quality in height measuring is not only solid but also wireless and network-capable.

Anyone looking for obvious benefits will find them in the digital stadiometers seca 274 (for use anywhere) and seca 264 (permanent wall installation). For instance, in the three-part measuring rod that is easy to assemble and fasten with screws. There is also the non-slip rubber mat (seca 264) or a sturdy glass platform (seca 274), white backlit displays in the headpiece and secure wireless transmission of measurements. Data can be transmitted to seca 360° wireless scales which can calculate the BMI from height and weight in just a few seconds.

### A stable basis – for precise measurements.

It's all the same if you decide in favor of the wall-installed seca 264 or the free-standing seca 274 because both provide precise height measurement to the millimeter. Noteworthy features include the three-part measuring rod of high-quality aluminum and the robust headpiece, which glides smoothly along the rod. All the while the patient stands safe and secure – even with wet feet.

*The stable glass platform of the seca 274 with integrated heel positioner guarantees precise measurements and firm and safe footing.*

### A convenient basis – for fast measuring.

The goal of accomplishing more in fewer steps is as important in medicine as in other fields. The stadiometers seca 274 and seca 264 help make that possible. For example, the heel positioner and the seca Frankfurt Line on the headpiece ensure that the patient is in the right position and thereby contribute to obtaining accurate measurements. Height measurements can be read with a quick glance at the white backlit display on the headpiece. No matter if the patient is a small child or an adult – the height range from 30 cm to 220 cm is greater than that of conventional height measuring instruments.

### Paperless and error-free wireless transmission of measurements.

With the seca 360° wireless technology the stadiometers seca 274 and seca 264 can transmit measurements to the optional seca 360° wireless printer. The combination of network-capable software seca analytics 105 and the USB wireless adapter seca 456 equip your PC to receive and analyze data and make all data available to an existing EMR (Electronic Medical Record) system. This capability makes the seca 274 and the seca 264 EMR-integrated and ready to handle electronic records and all the requirements the future will bring. More information about EMR-integrated devices is at [www.seca.com](http://www.seca.com)

## seca 274 and seca 264

### Technical Data

- Measurement range: 30–220 cm
- Graduation: 1 mm
- Scale Dimensions (WxHxD):  
434 x 2.394 x 466 mm (seca 274)  
428 x 2.318 x 474 mm (seca 264)
- Platform dimensions (WxHxD):  
440 x 60 x 365 mm (seca 274)  
430 x 3 x 370 mm (seca 264)
- Weight of scales: 15 kg (seca 274),  
5 kg (seca 264)
- Power supply: batteries
- Data transmission: seca 360° wireless technology
- Functions: HOLD, user-defined zero setting, automatic switch-off, SEND/PRINT
- System compatible with: 360° wireless printer advanced seca 466, 360° wireless printer seca 465, software seca analytics 105, 360° wireless USB adapter seca 456

*Exact measurement results are guaranteed by precise positioning of the head made possible with the seca Frankfurt Line.*

*The white backlit display on the headpiece is very easy to read.*

*Patients can stand comfortably on the rubber mat of the seca 264 while the heel positioner makes sure those bare feet are in the right place on the platform.*
